3mm High UV Trellis Rope

Redpath's 3mm High UV Trellis Rope has been specifically developed as a **non-abrasive, long-life, pre-stretched solution** for berry trellising. Designed with the needs of commercial growers in mind, it maintains its tension over time — **greatly reducing the need for re-tensioning** throughout the season.

With its **high UV resistance** and durable construction, this rope performs exceptionally well in both tunnel and open-field environments. Ideal for supporting blueberries, raspberries, and blackberries, it offers consistent performance, is **non-abrasive** and gentle on plants, and gives a professional finish to any trellis system.

Key Features:

- ✓ High UV resistance for long-term outdoor use (estimated service life up to 5 years)
- ✓ Carbon black for additional lifespan
- ✓ Non-abrasive to reduce crop damage
- ✓ Pre-stretched to reduce the need for re-tensioning
- ✓ 3mm Diameter (nominal)
- ✓ Manufactured from high-tenacity Danline polypropylene (PP) yarn
- ✓ 207 kgf minimum breaking strength

* Compatible with a
3.2 - 4.2mm Gripple
or Tensioner

AVAILABLE IN:

Single 2,000m Coil or Pallets of 48
