

Specially designed for skinning film onto tunnels

Tunnel Rope

Tunnel Rope is designed based on feedback from growers and tunnel installers. With tunnel film being a significant investment, don't risk it with inferior ropes — choose one specifically engineered for skinning film onto tunnels.

Key Features:

- ✓ **Highly UV Stabilised** - designed to withstand degradation from direct UV exposure, with an expected service life of up to 8 years.
- ✓ **High Strength** - 6.5mm diameter for added durability and reduced risk of film loss during storms.
- ✓ **Low Stretch** - Pre-stretched yarns for better fit on tunnels with no slippage and no need for re-tensioning.

Specifications:

CODE	DESCRIPTION	UNIT	SIZE
TUNNELROPE	Tunnel Rope BLK 6.5mm x 400m PP High UV	Coil	6.5mm x 400m
TUNNELROPE50	Tunnel Rope BLK 6.5mm x 50m PP High U.V	Coil	6.5mm x 50m
